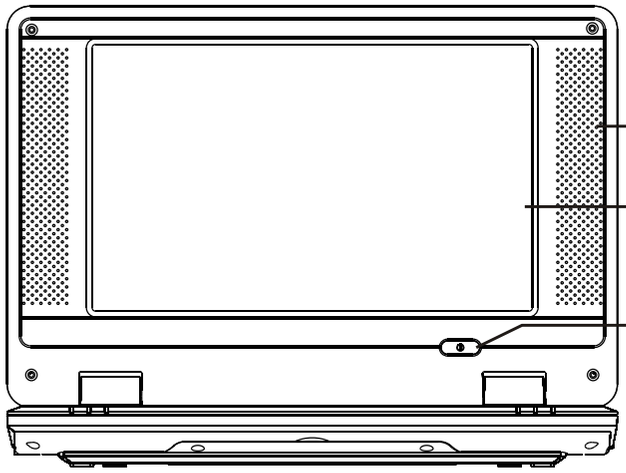
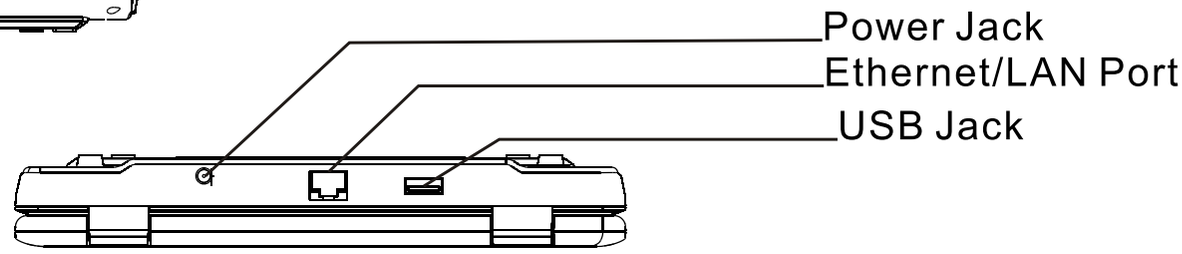
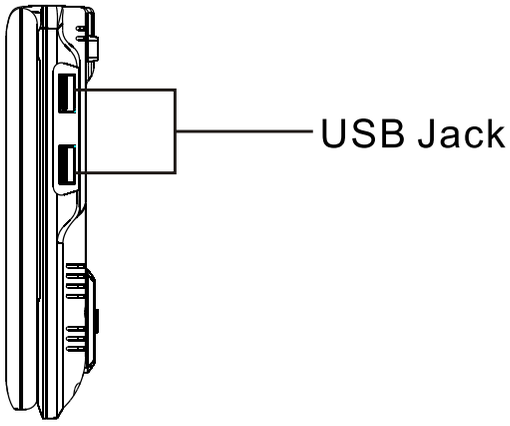
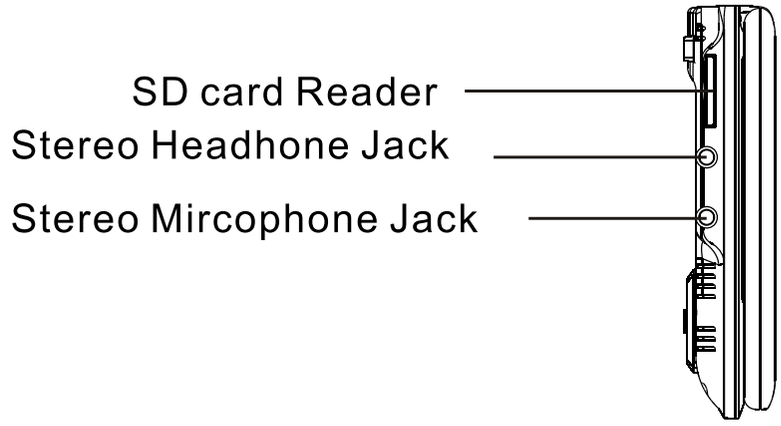
2. SmartBook Description

2.1 Appearance Description









2.2 Desktop Description

3. Battery Charge

SmartBook has a built-in battery, the system will recommend to charge when the battery power is low.

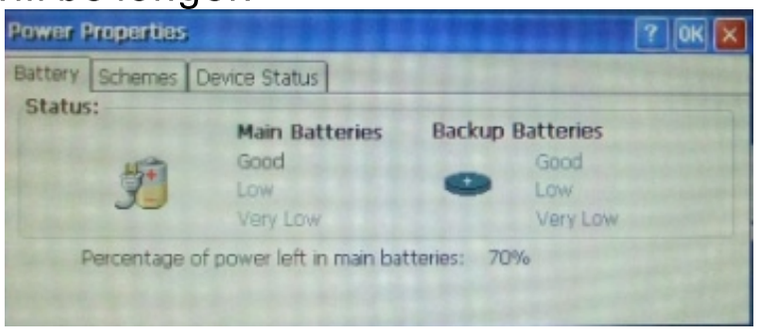
Charging Method

1. Plug in the power adapter, the battery charge indicator light changes to show it is charging. When the battery is fully charged, the indicator light will automatically shut down.
2. During charging, the user can still use SmartBook.

Notice:

Turned on, and charging time will be longer.

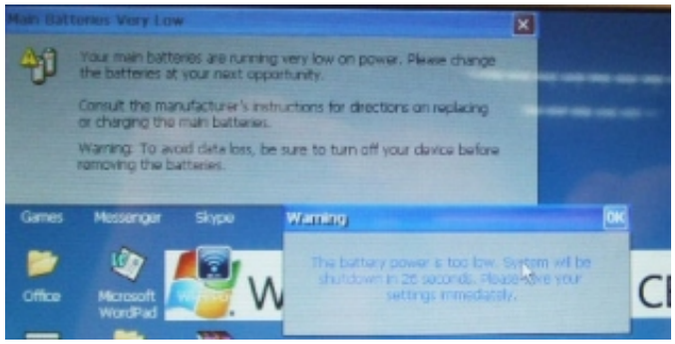
Check the level of battery



Double-click the desktop icon in the notification area of the battery will pop-up "Power Properties" window, you can view the current battery power.You can also via "Start" Menu - "Settings" - "Control Panel" icon to find the power control to open the "Power Properties" window.

Status	Description
Normal	Normal battery
Inadequate	Power consumption is low, the need for recharging
GrosslyInadequate	Very low power consumption, we must charge

When the battery power is low, the system will automatically pop up the following tips.



4. Basic Operations

4.1 Power Switch

1.Power on: When using the power adapter, the user can press the power button boot.

2.Power off:

a)The user press the power button (2 seconds),it will pop up a dialog box, select "Yes" to shut down the system.
b)Through the Start Menu to shut down the system.
c)The user press the power button still(8 seconds) ,the system will automatically shut down.

4.2 Start Application

The application can through double-click the icon on the desktop application to run, but also can use the "Start" menu - "procedure" to select the program to run.

Notice：
When the application is running, click on the icon can be minimized application window ,show the desktop.
We do not recommend running multiple applications, or open multiple IEwindows, otherwise the system will become very slow.

4.3 Keyboard Introduction

SmartBook use the American-style 80-keys standard keyboard.

Function keys are as follows：

		Page Up
		Home
		Page Down
		End
		F11
		F12
		Scroll Lock

The number keys are as follows：

Press switch to the digital input mode . Directly use the above-mentioned key to input corresponding values.Press it again to switch back to the letter input.

4.4 Touchpad

Touchpad is composed of the running track capable of sensing fingers and feeling the pressure plate and two buttons，two buttons is equivalent to the standard left and right mouse button.

Notice：

Please do not place objects on the touchpad surface, it can be scratched or crushed.

4.5 How to use SD Card
